

Easter Holiday Design Competition

During our last break, many of you sent in eco-bricks made of non-recyclable plastic and we now want to use these to make something for our school!

Since Harlow is a **sculpture town**, we want to build our own sculpture out of these reclaimed materials to raise the profile of our school and to demonstrate how everyone in Harlow can do their part to help the environment.

Your sculpture designs must...

- Include eco-bricks as the **main** material, we want the whole sculpture to be made of these bricks!
- Be labelled with the amount of bricks needed, and the size of the sculpture's dimensions.
- Should link to our overarching mission of helping raise awareness for the environment!

We currently have 217 bottles:

165 are large

30 medium

22 are small

Your design can be functional or abstract – it is up to you! Bring your ideas (drawn up) to school and we will pick a winning design after the Easter holidays.
